Solo developer.

São Paulo, Brazil

Qualidade Inteligente

Jan 2022 – Sept 2022

- Worked with the team to understand their issues and develop a problem-solver app, to simplify their agenda previously made in an excel spreadsheet.

- Adapted the company's website to appeal to more potential customers and better express our work line and mindset.

- Structured databases, developed with NextJS, TailwindCSS, and set up hosting.

Notable Projects

Company Website Design and Development

qualidadeinteligente.com.br

- Employed great and newly developed technologies, such as NextJS.

- SEO and social media share preview.

- Transformed the idea into a production-ready website.

Personal Website Design and Development

adomaitisc.com

- Iterated various versions on Figma.

- Used IntersectionObserver API for JavaScript and CSS animations.

- Developed with NextJS for SEO and accessibility for crawlers.
